PROFILE

Product Designer with 9.5 years of experience owning end-to-end UX for complex, data-heavy B2B SaaS products — making sophisticated workflows intuitive and efficient for professional users. Works closely with Product Managers, Tech Leads and Engineers to balance user needs, business goals and technical constraints. Contributes actively to design systems and brings both qualitative research and usability data into everyday product decisions. Validated outcomes: SUS 83.1 (Excellent) and SUS 72.5 (Good) on two shipped enterprise tools.

EXPERIENCE

Senior Product Designer, Accenture

Enterprise tools for aeronautical engineers · Dec 2022 – present ·

- Owned end-to-end UX design for 4 complex, data-heavy enterprise products — from discovery and problem framing through ideation, validation and delivery, in close collaboration with product and engineering teams.
- Made sophisticated expert workflows intuitive and efficient: separated genuine user needs from accumulated workarounds through user interviews, shadowing and workflow mapping.
- Contributed to and evolved a Design System: migrated a core application to new system standards, improved consistency and accessibility across the product, and reduced design-to-development friction.
- Supported design decisions with usability data: defended interaction model decisions against stakeholder resistance with structured testing results rather than rationale alone.
- Achieved SUS 83.1 (Excellent) and SUS 72.5 (Good) — measurable improvement in UX quality across two delivered products.

Product Designer, Egnyte

B2B SaaS · Enterprise file management platform · May 2022 – Dec 2022

- Owned full design cycle for a complex B2B SaaS platform — balanced user needs, business goals and technical constraints across four surfaces.
- Combined qualitative research (7 in-depth user interviews) with product metrics to surface unmet needs and directly redirect MVP priorities.
- Redesigned filter architecture through card sorting, reverse tree testing and usability tests on competing prototypes — iterated based on data, not assumptions.

Product Designer, Allegro

Internal operational tooling · One of Poland's largest e-commerce platforms · Aug 2021 – Apr 2022

- Designed and optimised critical internal workflow tools for operational teams managing high-volume, data-intensive processes.
- Delivered validated solution including a duplicate-detection feature that reduced friction in a critical daily workflow for the administrator team.

Product Designer, Bank Pekao

One of Poland's largest banks · Apr 2020 – Aug 2021

- Redesigned information architecture and navigation — resolved a multi-stakeholder conflict through a research-led structural solution, presented and defended to senior leadership.
- Contributed to usability testing, wireframing, and developer handoff within an Agile cross-functional team.

Product Designer, Accenture, Bank Millenium

One of Poland's largest banks · Mar 2019 – Apr 2020

- Designed digital banking interfaces across mobile and web; contributed to usability testing and developer handoff within an Agile team.

Junior Product Designer → Product Designer, WP Pilot

Online TV streaming platform by Wirtualna Polska, one of Poland's largest media groups · Apr 2017 – Feb 2019

- Grew from Junior to Designer; designed cross-platform streaming experience across four surfaces and contributed to usability research and iterative prototyping.

SKILLS

End-to-end UX ownership · Complex data-heavy interfaces · Interaction design · Usability Testing User interviews · Usability testing

TOOLS

Figma (advanced) · Figma Make · FigJam · Miro · Claude · Jira · Confluence

EDUCATION

MFA, Graphic Design · Academy of Fine Arts, Warsaw · 2010–2016

LANGUAGES

Polish: Native · English: C1 (advanced proficiency)
